# HackTrain 4.0 Judging Criteria

The Judging criteria is split into **4 categories**:

Impactful (15%)
How would this MVP impact the transport industry in the UK? Is it a game changer? Could this MVP be deployed industry wide?

MVP/Prototype (50%)
Business Perspective
Does the MVP express well their solution for the problem? Would people use it? Did they build their MVP with their customer in mind? Is it memorable? Does the project have appropriate graphics? Is it intuitive and easy to use? Do you *like* how the project is structured, from a user's point of view?

Technical perspective
Does the project meet its goals? Can it be used by everyone? Does it work properly? Does it have enough working features? Are the features implemented the ones that define this project.

Does the team uses appropriate technologies / frameworks? Is it simple to setup or get it running? Are the *system* requirements appropriate? Did the team build with scalability in mind? *Does it work in my browser/device?*

Pitch Presentation (10%)
Was the idea well delivered? Did the team *convince* you about how awesome their project is? This is about rating the quality of the presentation in the perspective of an investor/expert.

Design (25%)
How well has the product been designed from a user experience perspective? Does it flow well? Is it simple and easy to understand? Is the user interface modern and practical?
